

amazed at the loss of prestige which President Roosevelt seems to be suffering so far as the voters of the Buckle State is concerned. "When I came to Washington the last of December," he said, "I knew many of the leaders of the party in the State were not in sympathy with him, but this feeling had not reached down to the masses of the voters. I now find a great deal of discontent among the latter. I think the Panama Canal disclosures are responsible for the change in sentiment towards the President. The people think he has gone along in rather a high-handed manner, paying enormous salaries to messengers, doing more cheaply than the President proposes to have it done. The appointment of Bishop as press agent of the canal, without the sanction of Congress and at the big salary of ten thousand a year, has hurt the President, especially as he was a warm personal friend of the appointment of Bishop to a commission, after the Senate had raised such a row about him did not help the President any."

Secretary Taft is sitting up nights poring over his report on the work being done in Panama. He has obtained the assistance of Secretary Root. In the preparation of the report, and the two of them will try to make the best showing possible, one that will quiet the Senate and House, especially the latter. The simple fact is that the Panama Canal is working on the Isthmus, and that hardly any dirt has been moved, remains, which, taken in connection with that other fact that millions of dollars have been expended by the government down there and that eleven millions have just been voted for the use of the President and the Canal Commission, makes it hard to exhibit a showing which will relieve the Secretary of War and the commission of severe criticism.

**Work on the Battleships.**  
The annual report of the Bureau of Construction and Repair of the Navy Department says that the work on the battleship Connecticut is progressing satisfactorily, and that, but for delays in the delivery of armor, it is more than probable that this vessel would have been completed in contract time, in which case it would have been the first vessel constructed since the reconstruction of the navy began in 1883. Continuing, the report says:  
"It was anticipated that the cost of construction of the Connecticut in a navy yard would exceed the contract price of the Louisiana, her sister vessel, under construction at Newport News. Every effort, however, is being made to keep the cost within the limit fixed by Congress, and it is hoped that it will not be necessary to recommend an extension of the limit of cost in this case. The state of progress of work on the Connecticut is slightly in advance of that on the Louisiana, but many months of work of progress has been almost identical, and it is safe to assume that the dates of completion of the two vessels will not differ to any considerable extent."  
The report then recites a reference to its annual report of last year, in which it said:  
"Although every possible precaution is being taken to reduce the cost of the Connecticut to the most economical basis, it can hardly be hoped that the work will be done as cheaply as when performed in private shipbuilding yards, whose rates of pay for nine hours' work are in many places less than those being paid for eight hours' work at the navy yard at New York. It may also be noted that private yards do not pay their per diem employees for holidays or when on leave, whereas a very large proportion of the per diem employees on the Connecticut receive pay for fifteen days' leave and seven public holidays during the calendar year, without any work being done in return therefor."  
"One of the principal objects to be attained in building vessels in government yards is the maintenance of the organization of the yard and the provision of suitable working conditions for the mechanics during the absence of the vessels."  
From the above it will be seen that if the navy yard at Brooklyn is able to complete the Connecticut in the same length of time and at the same cost as the Louisiana is completed, the Navy Department will be inclined to recommend that the Connecticut be built by the government.  
The Texas was built at the Norfolk navy yard.  
It seems that the Connecticut has gotten very much the advantage of the Louisiana in the matter of armor, although the Navy Department complains that the Connecticut is delaying the work on that vessel. The report shows that she has been 1,599,944 pounds of armor delivered for the Connecticut and only 1,067,828 for the Louisiana.

**Norfolk Navy Yard.**  
In its recommendations for the Norfolk navy yard the report says that it must be improved, and that at present it is in rather a neglected condition, owing to limited appropriations made in the past. It says in part:  
"The yard is located on Elizabeth River, easy reach of Hampton Roads, which large fleets must of necessity rendezvous. The channel, though perhaps not as deep and as wide as it ought to be, can easily be increased, both in depth and width. Its location shelters it from rough seas and from the enemy in time of war."  
"It seems evident that the best interests of the government require that this yard be made one of the foremost in the country."  
"Improvements in this yard have not kept pace with the increase of the navy. In recent years appropriations for the yard have been comparatively limited, and the improvements authorized have been limited and have not formed part of the general scheme covering the comprehensive development of the entire yard. Many of the present buildings are very old, sadly in need of repairs and painting, or renewal in some cases; many streets remain unimproved; the waterfront in general should be improved."  
"It would appear that the best interests of the government require that the development of this yard proceed on a liberal and comprehensive basis, commensurate with the demands that must inevitably be put upon it in this location."  
"This matter cannot be too strongly urged. In the past determined efforts have been made to meet these demands, but the government has been insufficient to meet these demands."  
"A start in the right direction has been made in the acquisition of the Schmoede tract, but there are no funds available for acquiring it to keep out the public."  
"In addition, the Schmoede tract, the department declares that it is highly important to extend the north end of the yard, by taking in two or three city squares adjacent to it."

**Tutwiler Will Win.**  
Those who are acquainted with the situation believe that the contest between R. A. Tutwiler to be postmaster at Staunton, to succeed Major Sam Yost, will be sufficient to land him in the office.

**Mad Michigan Man Then Turns Gun On His Own Miserable Body.**  
ROCHFORD, Mich., January 2.—Alarmed by the deserted appearance of the farm house of Clarence A. Barnum, who recently located here, neighbors broke into the house to-day and found Barnum, his wife, his daughter, Louise, aged twenty-three, and his son, Clinton, aged sixteen, all lying dead. The wife and the son and daughter had apparently been murdered with an axe. A single-barreled shotgun lying near his corpse, and the fact that his head was entirely absent, showed how Barnum himself had met his end. Mrs. Barnum's body lay in the woodshed. It appeared that she had been a long time resisting the murderer for a brief time, or at any rate had succeeded in making him long enough to reach the shed. But she was struck down and met the same fate that had befallen her son and daughter.  
Barnum sold a farm near Homer, Mich., only a few months ago and located here late in the season. It is said that the harvest in his new home did not meet his expectations, and that he had become despondent.

**FARMER KILLED ENTIRE FAMILY**

**O.H. Berry & Co.**  
MEN'S & BOYS' OUTFITTERS

In the place, despite the determination of Major Yost to carry his fight to the White House.  
When Colonel Siemp was trying to get control of the Republican machine in Virginia he found his way effectively blocked so long as the Brown-Allen crowd in the Tenth District were allied with the Agnew-Bowden people. It was then that an understanding was reached, whereby the "Allen-Tutwiler" strength should go to Siemp and that in return Siemp should support Allen for reappointment as United States marshal, and Tutwiler should have his endorsement for the postmastership at Staunton. It was this coup on the part of the Siemp-Agnew-Bowden crowd. The recommending of Tutwiler is but one of the reciprocal acts promised by Siemp to the Brown-Allen crowd.

**INDICT MARYLAND BANK OFFICIALS**

Henry J. Bowdoin, Vice-President of Trust Company, Arrested For Fraud.  
**TWO OTHERS ARE WANTED**  
One, Said to Be J. Wilcox Brown, Is Living In Afton, This State.

BALTIMORE, MD., January 2.—The grand jury which has been investigating the affairs of the Maryland Trust Company under the old regime to-day returned presentments against three of the former officials. One of them, Henry J. Bowdoin, who was the vice-president, and in active charge at the time of suspension, was arrested on a capias under a bond of ten thousand dollars. The other two have not been arrested, and until they are taken into custody their names are withheld by the State attorney's office.  
It is stated unofficially, however, that they are J. Wilcox Brown, formerly president of the company, and now residing at Afton, Va., and J. Bernard Scott, formerly the company's treasurer, and now, it is said, a resident of Georgia. Friends of these two express the opinion that they will, as soon as they learn of their presentment, return to this city and give bail.  
The presentments charge violation of the law prohibiting issuing of "false or fraudulent statements regarding the financial condition of any corporation." No specific offense is cited, and the Maryland Trust Company is not named. Mr. Bowdoin refused to make any statement, referring all inquiries to his attorney, who declares himself as his client utterly in the dark, except for the bald fact of the presentment.

**VERKES CUT OFF HIS PRODIGES**  
No Provision For Emilie Grigsby and Gladys Unger in Late Millionaire's Will.  
**BIG BEQUESTS TO CHARITY**  
Before and After Death of Widow Hospitals and Arts Receive Handsome Sums.

(By Associated Press.)  
NEW YORK, January 2.—In his will, read to-day by Clarence A. Knight, his attorney, the late Charles T. Yerkes makes many public bequests, including \$100,000 in trust, the income to be paid to the University of Chicago for the maintenance of the Yerkes observatory at Lake Geneva, Wis. Provisions are made for the disposal of his New York home after the death of his wife, to a corporation organized for the maintenance of his art gallery, the sum of \$50,000 to be given in this respect upon Mrs. Yerkes' death. Mr. Yerkes also provided for a hospital to be erected in New York, at a cost of \$50,000. His widow, son and others are provided for. The will was read to the members of his family to-day, and they expressed entire satisfaction with its provisions.  
Mrs. Yerkes is given the Fifth Avenue house, with its art treasures, the income from one-half the estate during her lifetime, and \$200,000 in cash. A like sum in cash is given to the son and to the daughter, each of whom is to have the income from one-quarter of the estate. At Mrs. Yerkes' death the remainder of the one-half, less \$750,000 for the art gallery and \$500,000 for the hospital, shall constitute a fund for the maintenance of the hospital.  
The matter of the consolidation of the two cities on the James was not in shape by the acceptance of the joint committee's proposition to have a special steering committee to work on the State Legislature for a general permitting contiguous cities and towns to consolidate as one municipality.  
The vigorous reply of Superintendent Knowles, of the Gas Works, to the gas expert which appears elsewhere in this paper, came before the body without being read it was ordered printed.  
Two members of the body resigned and their places were filled in the usual way.

**NOW ON WAY TO SEE PRESIDENT**  
(Continued from First Page.)  
"I believe," Mr. Coulter replied, "that the American administration of the customs is acceptable to both political parties, though some of the literary and professional classes resent it from patriotic motives. It is certain that such an intervention on the part of the United States as would secure a continuance of good order, would be heartily welcomed by the commercial and agricultural classes. It's only active opponents would be the politicians who see their opportunities liable to be curtailed."  
**John Funk.**  
(Special to The Times-Dispatch.)  
WOODSTOCK, VA., January 2.—Mr. John Funk, one of the most successful farmers and financiers of Shenandoah county, died this morning at his home, near Maurentown, after a short illness of pneumonia. He was about seventy years of age, and was a member of the Shenandoah National Bank, of Woodstock. He leaves an estate estimated to be valued at from seventy-five thousand to ninety thousand dollars.

**A PUBLIC CALAMITY**  
(By Editor Wood of "Wine and Spirit Review.")  
Editor Bohannon of a recent editorial on the discovery in this city of a specific for chronic Bright's disease declares from personal knowledge that the curability of this disease is a matter of the most established fact. He closes a strong article thus:  
"Many broad physicians are using the new diuretic, but a review of the (terrible) annual death list from this disease the fact that medical ethics prevent them from proclaiming the discovery to the public. It is a matter of the most established fact. He closes a strong article thus:
